## FOREWORD

On behalf of the National Council of Educational Research and Training, I have great pleasure in presenting this list of theses and dissertations approved by Indian Universities for the Master's and Doctorate degrees in Education till December 31, 1961. It enumerates a total of 85 doctoral theses, 114 theses for the M. Ed. degree (in *total* fulfilment of the requirements), and 2742 dissertations for the M. Ed. degree (in *partial* fulfilment of the requirements).

The advantages of this compilation are obvious. At present, there is no single reference document available in which one can find all the theses and dissertations approved by Indian Universities in Education and this becomes a handicap for the proper development of further research. It was, therefore, felt that one of the major functions of the National Council of Educational Research and Training would be to bring out such a list for the period ending December 31, 1961 in the first instance and thereafter to bring out a separate volume for each calendar year.

Steps are also being taken to get brief synopses of all these theses and dissertations prepared and these will be published in a series of volumes in the near future.

This list was first published in 1963 in a mimeographed form and circulated to training institutions and universities for suggestions, comments and amendments. We are grateful to all those who have sent us their valuable suggestions and made this publication possible.

## EXPLANATORY NOTE

*What this List Includes:* This list includes educational theses and dissertations approved by Indian Universities for the degree of Ph.D., D.Phil., or D. Litt. and M.Ed. (inclusive of the M.A. degree of the Calcutta University in Education) upto 31 December 1961.

*How the Theses/Dissertations are Arranged:* For convenience of reference, the list has been divided into three parts :

Part One	Doctoral Theses;
Part Two	Theses in <i>full</i> satisfaction of the requirements for M.Ed. degree;
Part Three	Dissertations (also called 'theses' in some universities) in <i>partial</i> satisfaction of the requirements of the M.Ed. degree (inclusive of M.A. in Education at Calcutta).

In each part, the theses or dissertations have been arranged according to universities; in each university, they have been arranged chronologically according to the year in which they were approved; and where more than one thesis or dissertation are approved in the same year, they have been arranged according to the alphabetical order of the names of the authors.

*Reference Numbers of Theses/Dissertations:* Each thesis/dissertation has been assigned a serial number in the order in which it appears in the list. This reference number will be continued in subsequent volumes of this series also and will be used in the indices.

*Indices according to Authors and Subjects:* At the end of the list, two indices have been added. The first index gives the reference numbers of theses/ dissertations corresponding to the names of the authors which are alphabetically arranged; and the second gives the reference numbers of theses/dissertations classified according to subjects.

*Language of the Theses/Dissertations:* Some of the theses/dissertations are in the regional languages. In such cases, their subject is translated and given in English and the original language of the thesis/dissertation is mentioned immediately afterwards within brackets. Thus, for a Gujarati dissertation submitted to the Gujarat University, the entry is as follows:

SHUKLA, R.M. Survey of Irregularity of Pupils in Secondary Schools of Ahmedabad (Gujarati).

*Use of the Expressions 'Theses' and 'Dissertations':* There is no uniformity in the use of the word 'thesis'. For investigations approved for the doctoral degrees

(Ph.D., D.Phil., or D.Litt.), the expression 'thesis' is invariably used. It is also used for the investigations approved in *full* satisfaction of the requirements of the M.Ed. degree. When the investigation is in *partial* fulfilment of the requirements of the degree, however, some universities use the word 'dissertation', while others use the word 'thesis'. In order to avoid confusion, therefore, the following terminology pattern has been adopted in this volume:

The expression 'thesis' is used for investigations approved for the doctoral degrees of Ph.D., D.Phil., or D.Litt., and for investigations which are in *full* satisfaction of the requirements of the M.Ed. or M.A. (Education) degree.

The expression 'dissertation' is used for investigations which are approved in *partial* fulfilment of the M.Ed. degree, irrespective of the fact whether the university concerned calls it a thesis or a dissertation.
